Kidnapped by aliens when he was young, Peter Quill now travels the galaxy salvaging anything of value for resale. When he comes across a silver orb however, he gets more than he's bargained for. The orb is highly desired many but by none so powerful as Ronan. When Ronan finally acquires it, it's left to Peter and his newfound friends Gamora, Drax, Groot and Rocket to stop him. After discovering a mysterious orb in another part of the galaxy, Peter Quill from Earth, is now the main target of a manhunt led by the genocidal villain Ronan the Accuser. Being hunted across the galaxy, Quill gets lumped together with a group of misfits that need to learn how to get along before they can become the "Guardians of the Galaxy". I loved this movie, saw it in IMAX 3D. The acting was great. The writing was great. The 3D was fantastic, very rarely was a part that wasn't 3D. I thought that there should've been more Thanos in the movie than there was and I wanted to see more of the villain, Ronin. The characters were very likable, my favorite was Rocket Raccoon. I thought having Howard the Duck in the film was very strange because he's not really a Marvel character. Stan Lee's cameo was funny as usual. If you do go see this film then I would recommend the 3D version over the 2D because the visuals are fantastic and worth the extra ticket price. Overall I would recommend this movie for sure to anyone looking for a great Marvel film or just an all around action/sci-fi film. Guardians of the Galaxy is nothing short of an amazing movie. If there's anything I can say, it's that it is the best superhero movie I have seen. Not only does it have the impressive set pieces and enough action to last you a lifetime, it has an emotional core and you actually get to care about each and every single character. Overall this movie is filled with all the required thrills and spills and is a first class action movie. It also has a great mixture of comedic value and a deal of seriousness.

The film's unlikely hero is Quill (Chris Pratt), an eccentric gunfighter in the Han Solo mould who we meet stealing a metal orb coveted by the evil warlord Ronan. When he dispatches his top assassin, the green-skinned Gamora (Zoe Saldana), to recover the artifact, the pair find themselves locked up, along with the galaxy's most unlikely bounty hunters - a gun-toting raccoon (Bradley Cooper) and his sidekick (Vin Diesel) who just happens to be a walking tree. All the actors do a great job at portraying their characters, they feel real beings. You get to know about them and their struggles and you become attached to them. Every character in the movie got their time to shine, especially Rocket Raccoon who is voiced perfectly by Bradley Cooper. Everyone is pitch perfect in their roles even Batista!

For those that want specifics: effects were top notch, acting was excellent, story lines were compelling, the comedy was perfect 99.5% of the time and surprise there were a lot of one line typical superhero zingers that worked really well. What really can't be stressed enough is just how insanely fun and entertaining Guardians of the Galaxy is for literally its entire two-hour-plus run-time. I still have a hard time wrestling with who was my favorite actor in this. all in all, the film is brilliantly well done, action scenes are engrossing and genuinely done, you genuinely worry about certain characters and I for one was thrilled with it. Go see this. Director James Gunn's presumptive franchise-starter is overlong, overstuffed and sometimes too eager to please, but the cheeky comic tone keeps things buoyant — as does Chris Pratt's winning performance as the most blissfully spaced-out space crusader this side of Buckaroo Banzai. The Guardians of the Galaxy are a fictional superhero team published in Marvel Comics. From what has been confirmed so far, this film is based on the 2008 modern day incarnation thought up by Dan Abnett and Andy Lanning, not to be confused with the 1969 future version of the same group. Its members consist of Drax the Destroyer, Groot, Star-Lord, Rocket Raccoon, Major Victory, Phyla-Vell, Mantis, Cosmo, Bug, Moondragon, Adam Warlock and Gamora. They often team up with Nova, Quasar and the Inhumans, among other intergalactic characters. They have fought Annihilus, Thanos, Vulcan (Cyclops and Havoc's brother) and The Phalanx under Ultron's leadership. Drax the Destroyer, whose alias is Arthur Douglas, is a deceased human turned into a huge green space warrior created to specifically kill Thanos. Gamora is a lone survivor of her alien race who served as a former agent to (and is the adopted daughter of) Thanos. Star-Lord, whose alias is Peter Quill, is a half human, half Spartan intergalactic soldier. Groot is an extraterrestrial tree-like creature who is royalty on his homeworld and can regenerate most devastating wounds as a plant can. Rocket Raccoon is an intelligent, anthropomorphic raccoon created on Earth to be an expert marksman and master tactician. The main villain is Ronan the Accuser ([Lee Pace](#)). Nebula ([Karen Gillan](#)) and Korath ([Djimon Hounsou](#)) are secondary villains who

serve Ronan. The Collector ([Benicio Del Toro](#)) and Thanos ([Josh Brolin](#)) also make minor appearances but pose no direct threat to the Guardians. Since the character Yondu ([Michael Rooker](#)) serves as a foil to the main protagonist Peter Quill/Star-Lord, he can be considered a minor antagonist. Collector, while cruel to his slave, is not a villain, but rather serves as a buyer for the Infinity Stone. No, Thanos previously appeared during the closing credits of [The Avengers \(2012\)](#), where he was played by stuntman [Damion Poitier](#). The Nova Corps is a stateless interstellar police force in the Marvel Comics Universe, very similar to the Green Lantern Corps in the DC Comics Universe in many respects. The basic concept was introduced Nova vol. 1 #1 in September 1976 while the full organization introduced in Fantastic Four # 208. The main stylistic differences is that while the GLC members are primarily armed with a ring that can do nearly anything that the wearer has the imagination and willpower to create, the Nova Corps troopers are granted innate powers that are much like Superman's power set in many respects, such as super strength, flight, resistance to injury and power blasts from their bodies. Furthermore, they require more elaborate equipment for their operations such as their uniforms which have additional functions like built in communications and a life support system while using ships for long range space travel. Another notable difference between the two organizations is that the Nova Corps is a militia proper, featuring a formal ranking system (e.g. Corpsman, Millennians, Denarians, Centurions, etc). The Green Lantern Corps has no such system. During a scene where Peter is talking to Gamora and lets her listen to music, he reveals that the cassette player reminds him of his time on Earth, or Terra, as they refer to it. At the beginning of the film, we see Quill's mother is about to die and gives a present to Peter during her last seconds. At the end of the movie it was revealed that the present was another cassette that read "Awesome Mix. Vol 2". Since Peter Quill was born around the 1980's, most of the tracks that are recorded in those cassettes represent special moments in his life. It's one of the symbols that show that Peter is human, just like the insides of his spaceship, the Milano. It also represents an emotional attachment that Peter has to his mother, and it makes perfect sense since his mother was actually human. That is why, during his prison escape with the rest of the Guardians, he refuses to leave without retrieving his cassette player. Yes. Back in Knowhere, a bandaged Collector stands in the rubble of his lair, while one of his collections, the cosmonaut dog, comes by and licks him. A voice asks the annoyed Collector, "Why do you let him lick you like that?" The voice is revealed to be that of Howard the Duck, voiced by Seth Green. Stan Lee is seen on the planet Xandar. Rocket spots him with a younger woman and berates him for cheating on his wife. He laughs and calls him a Pervert. Yes. This film is part of the Marvel Cinematic Universe, the same universe as [Iron Man \(2008\)](#) (2008), [The Incredible Hulk \(2008\)](#) (2008), [Iron Man 2 \(2010\)](#) (2010), [Thor \(2011\)](#) (2011), [Captain America: The First Avenger \(2011\)](#) (2011), [The Avengers \(2012\)](#) (2012), [Iron Man 3 \(2013\)](#) (2013), [Thor: The Dark World \(2013\)](#) (2013), [Captain America: The Winter Soldier \(2014\)](#) (2014), [Avengers: Age of Ultron \(2015\)](#) (2015) and [Ant-Man \(2015\)](#) (2015). This film is part of Phase 2 of the Marvel Cinematic Universe setting up [Avengers: Age of Ultron \(2015\)](#). It takes place largely away from planet Earth (as does the comic book). In the mid-credits scene of Thor: The Dark World, Lady Sif and Volstagg bring the Aether to the Collector, who is played by Benicio Del Toro. When the Collector asks him why they are giving him the Aether, Lady Sif and Volstagg respond that they already have the Tesseract in Odin's vault on Asgard, and it would be unsafe to keep two Infinity Stones in one place. After Lady Sif and Volstagg leave, the Collector says, "One down, five to go". This scene serves a link between Thor: The Dark World and Guardians of the Galaxy. One important highlight of this scene is Adam Warlock's cocoon, which can be seen when Volstagg and Lady Sif are entering The Collector's vault.

In the comics, the stones were fastened to the Infinity Gauntlet, which is also stored in Odin's vault and was briefly seen in Thor. Thanos gets hold of the Infinity Gauntlet and has fought The Avengers on many occasions. Gamora is also Thanos' adopted daughter, which could have implications to her background as an assassin. It is possible that the film and the Marvel Cinematic Universe could follow this trend. Since this film takes place in outer space, referencing other characters and films was somewhat difficult. Most of the action that's happening in the Marvel Cinematic Universe occurs on Earth, so it seems there won't be any interaction with the Avengers for now. Even though this film has limited references compared to the rest of the films, there are still some that help establish a connection between them. During a scene when the Guardians visit the Collector, a Chitauri mask can be seen, referencing the events that took place in The Avengers. There is also a Dark Elf mask

from Thor: The Dark World, which is shown while Carina is cleaning the cage. In the after-credits scene, Adam Warlock's cocoon is seen again, this time in the background, but it is now open, probably due to the explosion after Carina touched the Infinity Stone. Shortly after the film's release, director James Gunn confirmed that Adam Warlock would thenceforth be a part of the Marvel Cinematic Universe. Terminal cancer. The Infinity Stones (Infinity Gems) are items with reality-altering powers that exceed every other force or power shown so far in the Marvel Cinematic Universe (MCU). When all of them are collected in an Infinity Gauntlet, the wielder is given power to destroy complete universes. Up to this point, a Infinity Gauntlet have been revealed, the right-handed one that was briefly shown in [Thor \(2011\)](#) inside Odin's chambers. It's hinted that only extraordinary individuals can survive touching the Stones barehanded, and even in that case, it requires a great willpower to use the power of the Stones without a Gauntlet itself. Although the Stones had not yet been explicitly mentioned in the MCU at this point, several of them had already come by up. In a proper filmmaking point of view, these are the MacGuffin that keeps the entire MCU franchise united. At the end of The Dark World, three of the six Stones have been revealed and located:

- Blue (Space Gem): Hidden inside the Tesseract, it can open portals to between universes. First seen in [Captain America: The First Avenger \(2011\)](#) (2011), where the Red Skull located it in a Norwegian monastery and used its energy to create highly advance weaponry during

World War II. It's hinted in [Iron Man 2 \(2010\)](#) (2010) that the original Arc Reactor technology used by Iron Man was designed based on knowledge Howard Stark once he recovered the Tesseract. In *The Avengers*, Loki and a mind-controlled Erik Selvig use it to open a portal to let the Chitauri army enter the Earth. Also, it's revealed that S.H.I.E.L.D designed new weaponry based on Tesseract technology as a backup in case the Avengers Initiative would fail. After Loki's defeat, Thor took it back to Asgard. It's kept in Odin's chambers and accessible to Loki once again, as well as the aforementioned Infinity Gauntlet, having taken control of Asgard during the events of *The Dark World*.

- **Red (Reality Gem):** Hidden inside the Aether, it has the ability to transform matter into dark matter. First seen in *The Dark World*, thousands of years ago in a war where King Bor of Asgard (father of Odin) defeated Malekith, leader of the dark elves. In modern times, Dr. Jane Foster discovered it once again while studying gravitational disturbances in London, putting her own life in danger. During the events of the Convergence, Malekith briefly took control of it inside his body, rendering him near invincible. After Thor's victory over him, it was handed over to the Collector to avoid having two Infinity Stones together in the same place. The Collector's alliances and ultimate goal were unknown at this point.
- **Yellow (Mind Gem):** Hidden inside Loki's scepter, it has the ability to control minds as well as create new ones, such as Ultron and the Vision. First seen in *The Avengers* when it is assumed that Thanos himself or The Other (leader of the Chitauri army) gave it to Loki. With it, Loki stabbed and killed Agent Phil Coulson, causing Iron Man, Black Widow, Thor, Captain America, Hawkeye and Hulk to unite to avenge him. Natasha Romanoff (Black Widow) used it to close the portal Loki and a mind-controlled Dr. Selvig created it to let the Chitauri army attack New York. S.H.I.E.L.D. took it under custody for study.
- **Purple (Power Gem):** Hidden inside The Orb. First seen in *Guardians of the Galaxy*, it has the ability to destroy entire planets at a molecular level. In a distant, unknown past, an old being called Celestial is depicted using it to eradicate life in a planet with a single blow. At some point of this remote past, it was guarded in planet Morag and lost in time until Peter Quill (aka Starlord) seized it from the planet's ruins just minutes before Kree soldiers under the command of Ronan the Accuser retrieve it. Ronan had the intention of wiping out the Nova Prime civilization as a revenge against them for an ancient war. Having each their own separated agendas, scavenger leader Yondu and The Collector (who at this point already has the Reality Gem), want to take control of it. Both Ronan and Starlord are seen surviving while using it barehanded for a short time. Following the failed massacre by Ronan, the Nova Corps, a planetary law enforcing organization, are protecting it.
- **Green (Time Stone):** Yet to be revealed.
- **Orange (Soul Stone):** Yet to be revealed.

These remaining two Stones and their respective powers are revealed over the course of MCU's Phase 3—comprised of [Captain America: Civil War \(2016\)](#) (2016), [Doctor Strange \(2016\)](#) (2016), [Guardians of the Galaxy Vol. 2 \(2017\)](#) (2017), [Spider-Man: Homecoming \(2017\)](#) (2017), [Thor: Ragnarok \(2017\)](#) (2017) and [Black Panther \(2018\)](#) (2018), culminating in [Avengers: Infinity War \(2018\)](#) (2018) and [Untitled Avengers Movie \(2019\)](#) (2019), with [Ant-Man and the Wasp \(2018\)](#) (2018), [Venom \(2018\)](#) (2018) and [Captain Marvel \(2019\)](#) (2019). Doctor Strange expands on the mythology surrounding the Infinity Gauntlet and reveals the Time Stone. Thor revealed that he would return to Asgard to learn more about the Infinity Stones; the backstory of which, the Infinity Stones and their creation may be unveiled in *Thor: Ragnarök*. a5c7b9f00b
